of promise case just tried in Tolland, tel. Connecticut, is described as a "brunette, with pleasant, regular features, and large, lustrous eyes, but evidently passing beyond the first bloom of womanhood." She is a school-teacher. George B. Williams is a "good-looking, stalwart farmer, with curly bair, unburnt face, and long, tawny beard, and is approaching middle age." As long ago as 1870, these two began to keep company after the Down East "sitting up" together until one or two o'clock at night, about once a week. In 1875, the courtship had progressed so far that marriage was talked about, and in the next year Miss Bishop says, Williams popped the question formally. She remembered the occasion well because she then for the first time sat is his lap, and he for the first time kissed her She made preparations for a wedding, but the lover, who had already occupied six years with courtship, was in the wedding-day twice, and finally refused to marry her at all. The jury Si. gave her a verdict for \$1,000.

unusually near, rain may be looked by. There's a man in Newtown, and pounds—it may afterward be condensfor, because when the air has nearly reached saturation there is a cessation of those vapor movements by which the air is rendered, in some degree, obscure. Sir Isnac Newton observed that the stars seemed nearer, and bet not dead yet."-[Harvard Lampoon. "You have to go away from home to ter adapted for observation, in the clear intervals of rain, or before showers, than at any other time.

Professor A. J. Schem, famed as a Professor A. J. Schem, famed as a statistician, makes the following statement: "Total population of the curth, 1908 752 000 and of Christian and Turkey; also in Spain, and in demand occasions a speedy waste several countries at the head of the of the vital air, which requires to be client director of the mint.

A straw about eight inches long, and no flaw in it makes a very efficient director of the mint. 1,396,752,000; under Christian govtina lands, 19,642,555,"
